LO

OCTOBER 8, 2023, AT 5 PM BENEFIT CONCERT FOR THE CREEK RESTORATION PROJECT

We need your help!

Every time it rains in Pacifica, the water creek slowly chips a soil away with only 3 feet of soil left before it touches the library wall.

There are two converging water creeks that touch the Church property, one coming from across the street, and the other from the upper mountain. While we protect the water that goes to the ocean, we also must protect our property building by adding a soil retention wall near the library. Your contributions will go a long way.

FEATURING:

Universal Choir

*Mater Dolorosa
